- Drying theory and practice
- Post processing

BUBBLE HASH TO ROSIN

- How to use Solvent-less concentrates in your day to day
- The role of solvent-less extract application in the medical and rec markets based on quality standard

RENT A RESIN COLLECTOR

We offer professional solvent-less extraction services in order to ensure our clients the highest quality with maximum yield in their final products.

Solvent-less extraction is an art form and the different techniques of extraction affect the qualitative and quantitative chemical profile of each section of the final product.

In many cases it can take a day to learn the practices of this art form, however perfecting the craft is a lifelong journey.

If you are looking to achieve the best expression possible from your material, we are here to help. Contact Jayden through WhatsApp or via email for more details on our processing service packages.

We have representatives around the country that are ready and willing to assist you in producing world class final products with the complete preservation of the volatile phytochemical profile of your plant material.

Please view our resources pages on our [website](https://www.fullmeltfiltration.com) for visual documentation of our processing, methods and techniques.

We are looking forward in being of service to you.
